**CONTENTS**

- 
- Editorial** 4
- 
- Antiseptics, iodine, povidone iodine and traumatic wound cleansing** 6
- This paper reviews the current literature on the use of antiseptics particularly povidone iodine in traumatic wound cleansing and discusses the beneficial and harmful effects.  
*MN Khan, AH Naqvi*
- 
- Optical assessment of skin blood content and oxygenation** 12
- Alteration of blood flow in skin and subcutaneous tissue is of great importance in the prevention of decubitus ulcers. This paper, first published in *Bedsore Biomechanics* in 1976, describes a technique for assessing changes in blood content optically.  
*JC Barbanel, F Gibson, F Turnbull*
- 
- The effect of pressure loading on the blood flow rate in human skin** 17
- This paper, first published in *Bedsore Biomechanics* in 1976, describes a method for the estimation of skin blood flow from the disappearance rate of an injection of  $^{133}\text{Xe}$  in saline.  
*CH Daly, JE Chimoskey, GA Holloway, D Kennedy*
- 
- Optimal method for isolation of human peritoneal mesothelial cells from clinical samples of omentum** 22
- Human peritoneal mesothelial cells are used to research the molecular biology of several pathologies. This paper compares methods of HPMC isolation.  
*M Riera, P McCulloch, L Pazmany, T Jagoe*
